AEOI Portal Update: CRS PORTAL UNAVAILABLE

Anguilla was severely impacted by Hurricane Irma on 6 September 2017, which caused widespread damage to communications, utilities and infrastructure, including many homes and buildings. The island was further affected by Hurricane Maria on 19 and 20 September 2017, which brought storm force winds and caused flooding in some areas. The process of recovery from both hurricanes is ongoing. As such the finalisation of the CRS module has been negatively impacted and will not be available for 30th of September.

The Competent Authority is seeking an official extension of the CRS reporting deadlines from Executive Council. Further update will be provided once this confirmation is received.

Thanking you for your patience and understanding in these difficult times.

.....
Kiel Connor
Comptroller
